FOUR TEETH OFF DUTY.

Their Owner Has to Advertise for Them After Tackling a Spring Street Tenderloin. An exceedingly modest young man from THE EVENING WORLD called at No. 110 Spring street this morning with a clipping from the advertising columns of a morning paper in his hand. The clipping read as follows : L OST—Saturday night, pair false teeth, in neighborhood of Bleecker and Broadway. Liberal reward for return of same to 110 Spring st.

No. 110 is a two-story building, and a sign on the wall bears the announcement that therein is "L. N. Fisher, Ladies' and Gents' Lunch Room."

A pretty waitress and a bald-headed customer, who was sipping coffee and munching crullers soaked in the beverage, were the only occupants of the lunch-room, and alonly occupants of the lunch-room, and al-though the reporter though there was some-thing suspicious about the breakfaster, he addressed the young woman—not, however, till he had looked up and down the street and satisfied himself that the white horse ac-

and satisfied himself that the white horse accompaniment was on hand.

"An advertisement in a morning paper offers a liberal reward for the return of some lost teeth," continued the reporter, blushing deprecatingly to show that he did not presume for an instant that the fair one before him could have lost any teeth.

She blushed too, so that her whole head

and face were nearly of a color. Then she smiled enough to show that the full comple-ment of pearls still adorned her mouth, and made it useful for something besides osculatory exercise.

made it useful for something besides osculatory exercise.

"He was one of our customers," she said archly. "He was giving his teeth a vacation after one of our tenderloin steaks, and thinks he must have pulled them out of his pocket with his handkerchief. No, he's not old—only twenty-nine—and it wasn't a whole set; only four teeth." At this the maiden blushed again, and felt of her curl papers.

"We thought—I mean he thought," continued the owner of the sunny hair, in a tremor of confusion at her mis-start, "that if we could get them back we would be willing to pay liberally for them." Then, earnestly, "I am so sorry you haven't found them." "But," persisted the gallant reporter, "You say 'we'! You certainly don't need them, even for use in a Spring street restaurant?"

There was more confusion, which was very much relieved by the entrance of other customers, and the reporter withdrew.

Capt. McElwain has been greatly bereaved by the death of his wife, and, to add to his discouragement, he is laid up with a severe attack of inflammatory rheumatism.

Inspector Byrnes enjoys his literary pur-suits and does most of the hard work on his novels. As a friend puts it. Byrnes furnishes novels. As a friend puts it, Byrnes furnishes the house and ground and Julian Hawthorns enters into possession and becomes a tenant.

Inspector Williams's Long Island farm consists of a burial plot in Cypress Hills Cemetery, and his other farm is in Woodlawn. His New York houses he knows nothing of, but he is the happy possessor of a seventeen inch Shetland pony.

The methods of trial Judges at Police Headquarters may thus be briefly summarized: Gen Porter—No lectures and a long docket speedily cleared. Mr. Voorhis—Rather slow and lectures galore. TIRED OF CLIMBING STAIRS

UPTOWN PROPERTY OWNERS PAY \$50,000 FOR AN ELEVATOR.

they No Longer Need a Balloon to Reach the Mevated Station at One Hundred and Sixteenth Street-The New Elevator Has Already Doubled the Value of Property in the Neighborhood.

HE highest and lowest points of the elevated road are only one station apart. At One Hundred and Fourth street it is twenty-two feet high, at One Hunfeet high, at One Hundred and Sixteenth The station platform cornice of five-storied flats. The neighborhood is a good one for residences, with its pure air, elevated

to Central Park and Morningside Park. Numerous flats have been built in that neighborhood. But people came up, looked at the flats, enjoyed the beautiful surroundings, then tilted their heads back and sighted the elevated road circling along in the upper air. Then they brought their heads back to the vertical, shook them, and departed. It was not vertigo that they feared; but climbmg ninety steps to get into a car was too

much for them.

John Sherwood and several other property owners in the neighbornood soon awoke to the fact. The result of their awakening is five stories high and it stands at the corner of One Hundred and Sixteenth street and Eighth avenue. It has four elevators worked by hydraulic pressure. Next Monday afternoon at 3 o'clock the tower elevator will be handed over to the Manhattan Railroad on a fifty years' lease at a rental of \$1 a year. They are bound by their contract to keep

noon at 3 o'clock the tower elevator will be handed over to the Manhattan Railroad on a fifty years' lease at a rental of \$1 a year. They are bound by their contract to keep the elevators running that term at their own expense. The expense will be \$7,000 or \$8,000 a year. The corporation known as the Central Park Improvement Company pays the taxes. It bought the land and built the tower at a cost of \$50,000.

The Manhattan Railroad has the privilege of buying the tower at any time within ten years by paying the cost and the taxes up to the date of purchase. The company that built the tower has reserved the right to incorporate it into an office building and employ one elevator for the use of that building, should they see fit. The four elevators that have been put into the tower are more than are needed now, but it is hoped that later they will all be called into service.

All the property owners from One Hundred and Tenth to One Hundred and Tenth to One Hundred and Twenticth streets and from Fifth avenue to Morning, side Park were interested in the erection of this tower. Property has doubled in value on account of it all through the neighborhood. About one-fifth of the property owners contributed to defray the expense of it.

it.

John Sherwood, the originator of the scheme, died last June before the foundation was laid. He was in favor of building an office block, of which the elevator should be office block, of which the elevator should be part. A lot 100 by 25 feet 11 inches was purchased. When he died he left it to his daughter, with the proviso that the stock company should possess it when it was organized. The directors of the company are Edward J. King, Burnett J. King, Simon Sterne, Daniel R. Kendall, Angelo R. Myers, Hiram Moore, Louis S. Brush, Edward H. Ripley, Alexander P. Ketchum, John D. Crimmins and William C. Orr. Simon Sterne is President, John D. Crimmins, Treasurer, and William C. Orr, Secretary.

C. Orr, Secretary.

The building is five stories high. It is built of brick, with Ohio sandstone trimings. The elevator raises passengers to a height of thirty-nine feet, and then a short height of thirty-nine feet, and then a short flight of stairs brings them to the platform. It has an attic and a basement. There is no stairway in the building, but on each story there is a two-inch floor and iron girders, so that, in case of accident to one elevator, pas-Sengers may be easily transferred to another. Two elevators run side by side on the north and south. Although solid and plain, there is an ornate finish to the structure. The roof
is in terra-cottatiles. The size is 25 feet and

One Bottle Cured Them Both.

NEW YORK, March 2, 1887.

Messrs. Wm. B. Riker & Son.

Gentiemen: I have been suffering all winter from a heavy cold, and have tried a great many different medicines for it, but all failed to benefit me at all; at last I heard from a friend (a friend indeed) that your "Rikeles Expectoranx" was meally a good medicine and would surely cure my trouble: so I got a bottle and began taking it. Before I had taken one-half the bottle I was as sound as ever. My wife was also cured of a severe cold by it. We did not mes the whole bottle butween us. I would advise everybody to use "Riken's Expectoranx" for a cough or cold.

Mr. J. W. Alexander and Miss Bessie Alexander, which takes place at 3, 30 on Wednesday, at Ziot Church. The reception after the ceremony will be at the home of the bride, 50 West Fifty-fourth street. The ushers will all be members of the family, including Mr. Henry M. Alexander, jr. Mr. William Alexander, Mr. Samuel Alexander, and Mr. Maitland Alexander. Even in New York, where there are so many

other distractions, the ladies all love the military and the gray and white uniforms of the Seventh Regiment are thought as adorable here as those of the City Troop are in Philadelphia. Naturally the dea of a large reception and even perhaps a deightful dance with the gray coats for partners causes quite an anticipatory flutter. It is said hat a dance will be given in the Armory on Nov. 19, in honor of Col. Emmons Clark.

Jack McCann, Joe Ellingsworth, Frank Bosworth and Mike Boden are the names of the four men Jack Dempsey is to meet at the Variety Theatre in Wilmington, Del., this week. The fight between Boden and Dempsey and Ellingsworth and Dempsey will give the friends of Reagan a pretty sure line as to whether Jack has gone back or not since his arm was broken. The way Dempsey performed with the arm which was broken nearly four months after Sullivan's was ought to convince the most skeptical of the thoroughness with which a broken bone on a healthy man knits together.

Catarrh to Consumption.

Catarrh in its destructive force stands next to and undoubtedly leads on to consumption. It is therefore singular that those afflicted with this fearful disease should not make it the object of their lives to rid themselves of it. Deceptive remedies concected by ignorant pretenders to medical knowledge have weakened the confidence of the great majority of sufferers in all advertised remedies. They become resigned to a life of misery rather than torture themselves with doubtful palliatives. But this will never do. Catarrh must be met at every stage and combated with all our might. In many cases the disease has assumed dangerous symptoms. The bones and certilage of the nose, the organs of basring, of seeing and of tasting so affected as to be useless, the uvula so elongated, the throat so infamed and irritated as to produce a constant and distressing cough.

"In the morning the master failed to appear, and after waiting a reasonable time the steward knocked at his door. Receiving no response, he called Mr. Riggs, the mate, who entered the stateroom and found it empty. The berth had not been occupied. When, after a search, it became, evident that the captain could not be found, Miller, the man who had taken the wheel at midnight, told the mate of Petersen's appearance and his conversation with him. Petersen was sent for, and found in his bed apparently sleeping. He was aroused and brought on deck in a very excited condition, and, on being interrogated by Mr. Riggs, he became incoherent and violent. They put her about and lowered a boat immediately, but he was never seen again.

"It seems clear that in a fit of insanity he murdered the captain and threw his body into the sea during the night. How this was accomplished no one knows, for no noise was heard nor were any traces of violence found anywhere about the vessel. Other theories as to Blaisdel's disappearance have been advanced, but this is the only plausible one and it seems to me to be the only one to account for it. Blaisdel was a man of good character, excellent habits, well balanced mind and a thorough sailor.

"On her present voyage Mr. Riggs, the former mate, went as master of the vessel. He was, I believe, thirty-six years of age, married, and had one child—a little girl of five or six years. It is our custom to allow our masters to purchase an interest in the vessels they command, and Mr. Riggs and his wife owned two-sixteenths of the Emily Brand. He was a man of the highest character and thoroughly competent to go as master. On this last voyage his wife and child accompanied him. I inclose a copy of the manifest and I can vouch for the good characters of the mate and steward."

ODDITIES IN PIPES.

The briar wood pipe which has been to a certain extent supplanted by an imitation meerschaum, is again in demand.

The homely, but serviceable, cob pipe is growing steadily in fayor. It should be cleaned frequently to insure sweetness.

The meerschaum with carved bowl and stem is in demand during the holidays, though seldom called for at other seasons.

In meerschaums, the old-fashioned, plair bowl and stom is still called for, although occasionally a novelty, attracts the smoker.

Briar wood pipes are made in every design the latest being a small oval bowl and four cornered stock, tipped with nickel, with long slender amber mouthpiece.

For those who want elegance as well as pleasure in smoking, the Turkish pipes are the best articles to furnish it. They are made in all styles, from the urn-like bowl with coils of rubber fitting to an amber moutapiece, to the more simple dish-pipe, so-called, which answers a similar purpose.

heard of again. Although I am far from being a superstitious man it is with many misgivings that I shall see Capt Church (who will hand you this letter) sall to-morarow. He was fully acquainted with all the disastrous details of the vessel's two unhappy voyages before he agreed to take her."

From this letter it became evident that the skeleton found up in the between decks space was that of Capt. Blaisdel, with whose name the initials engraved in the ring corresponded.

was that of Capt. Blaisdel, with whose name the initials engraved in the ring corresponded.

The remains, thus identified, were intered at Gibraltar.

Some hope of the rescue of the castaways was for a time entertained, as it was learned that the boat (the brigantine had but one) in which they were presumed to have left the ressel was a life-boat, new, light and incapable of sinking. Moreover it was known that they could not have encountered any had weather for many days after parting from the Emily Brand. Accordingly the widest publicity was given to the fact of their having disappeared, and for more than a year the civilized world was searched throughout with all the facilities at the disposal of our own Government and that of England, upon the chance that they had made some land or been picked up by some passing vessel. But no trace of the life-boat or of any of its occupants was ever discov red.

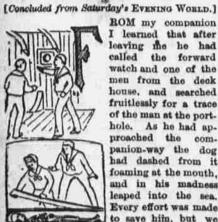

The Nomad weight anchor on the 20th of January, and a few nutils later we learned that the Emily I and had sailed for Genoa on the 6th of the following March, discharged her cargo, reloaded and made a safe and uneventful return voyage to New York. I have seen her name in the shipping lists a number of times since and I do not doubt that she is still affoat.

[CONCLUSION.]

*They were both Americans. Of the six seamen three were Germans or Prussians and their characters were afterwards asserted to be excellent, in a letter from a respectable resident of the late of Tohr, Prussia, written to the United States Consul at Gibraitar. Of the other three names of the crew list, one was a Portuguese and the remaining two were Clark and Gardast. I have since learned that the bearers of the last two were both from Maine, and has been consulted with the consultance of the last two were both from Maine, and has been consulted the two were both from Maine, and has been consulted to the consultance of the last two were both from Maine, and has been consulted to the consultance of the last two were both from Maine, and has been consulted to the consultance of the co

the room in which I had seen the phantom murder committed (if I may describe as "phantom" those who seemed no less real flesh and blood than myself) and of the between decks space forward of it, but we discovered nothing. At the edge of the porthole, however, at the spot where the hand had been, we found the bullet from the revolver buried in the wood.

By this time the seamen had gotten an inkling of the character of the ship's mystery; but as none of them had actually seen anything (nor strangely enough had heard the shot) Drayton's good sense and firmness triumphed over their superstition and we were enabled to work the derelict to port without difficulty and without further incident. A second night passed in her cabin by dent. A second night passed in her cabin by both of us was quiet and uneventful in every way; but we were satisfied that we had dis-covered the cause of her abandonment. The sailors would have said that she was

panion-way the dog had dashed from it foaming at the mouth, and in his madness leaped into the sea. Every effort was made to save him, but we never saw the poor fellow again.

The remaining hours of the night passed without incident, I related to Drayton what I had seen in the cabin, and we agreed that whatever the power was exhibiting itself on board the brigantine—whether human or superhuman, natural or supernatural—it was one that we certainly could not account for, theorize as we might. Drayton, however, held to his purpose of taking the vessel to Gibraltar, there to turn her over. with as much of her story s we could tell, to the Vice-Admiralty Gou ar investigation.

We made Gibraltar on the morning of the Manthed."

We made Gibraltar on the morning of the Stah of December and immediately reporting the circumstances under which we had found the Emily Brand, we turned her over to the authorities.

The remaining hours of the Queen's Proctor in Admiralty at once ordered a special survey of the vessel by the survey of the

him aboard the brigantine for the purpose of pointing out the movements of the phantom murderer. This official developed a rather remarkable detective ingenuity. He subjected me, in the course of our conversation, to a close cross-examination concerning the chisel or screw-driver, for which the ressansin had returned after the murder. On my remaining firm in my conviction as to what the tool appeared to be, he confided to me his theory of the terrible mock murder. I had witnessed. He believed, he told me, that the crime which had caused the vessel's abandonment had been revealed to me "by the spirits (as he expressed it) of the principal actors." I had witnessed. cur service some time before by a fall from the rigging, in which he sustained a severe concussion of the brain. For several months he lay in the hospital here in what was believed to be a hopeless condition of imbecility; but finally, having recovered or apparently recovered, he applied for a berth on the Emily Brand. Blaisdel, with whom he had sailed before, was perfectly willing to take him, as he had always borne a good reputation (though his looks belied him) and was an excellent ship's carpenter.

"When he shipped he was in good physical condition, so far as the captain could see, though at times still a little light-headed and foolish. Nevertheless, we wanted to give the fellow a chance, and, as we thought the ocean breezes might clear his head permanently, no objection was offered to his going as a sort of extra hand.

"On the 11th of December we received news by cable from Mr. Riggs, the mate, of the death of Capt. Blaisdel and the man Petersen. On the 26th a letter came giving the particulars, which were briefly as follows:

"About the eighth day out from New York Petersen developed symptoms of a relapse of his disease (caused by the fall), which seemed, however, to affect his mind only with a sort of intermittent stupor. He exhibited no signs of mania or violence, and

his disease (caused by the fall), which seemed, however, to affect his mind only with a sort of intermittent stupor. He exhibited no signs of mania or violence, and was capable of performing his light duties about one-half the time. He was, accordingly, not confined, and the master did what he could for him, treating him with the utmost kindness and advising him to 'lay off' his work. This he did for several days, but apparently without beneficial effect.

"On the night of Dec. 5 Mr. Blaisdel turned in at eight bells (12 o'clock). The weather was clear, the wind over the port quarter, and the moon, about half full lighted up the deck. The vessel was then distant between four and five hundred miles from Formigas, somewherr about latitude 38 north, longitude 17 west, near the point at which you picked her up. Just before two bells (1 o'clock) the man at the wheel saw Petersen, whom he recognized by his great size, cross the deck amidship to the starboard rail and throw something into the sea. On being hailed by this man Petersen went att and said that he had thrown a pair of old
